🔗 Saimahima29

Summary

Computer Science undergraduate specializing in Cybersecurity with knowledge of Java, full-stack development, and cloud technologies like AWS, Docker, and Kubernetes. Familiar with secure software development, CI/CD, and application security practices. Intermediate problem-solving and teamwork skills with a passion for building reliable systems.

Education

Koneru Lakshmaiah University (KL University)

July 2023 – May 2027

Bachelor of Technology in Computer Science and Engineering — **CGPA: 9.25 / 10.0**

New Vision Junior College

June 2021 – April 2023

Intermediate MPC — **CGPA: 93.9 / 10.0**

New Vision Concept School

June 2020 – March 2021

10th SSC — **CGPA: 10.0 / 10.0**

Technical Skills

Programming Languages: C, Java, SQL

Application Security: OWASP Top 10, API Security Basics, DevSecOps Fundamentals

Backend Development: Spring Boot, RESTful API Development

Frontend Development: HTML5, CSS3, JavaScript, React.js

Databases: MySQL

Cloud and Infrastructure: AWS Basics, Docker Basics, CI/CD Fundamentals

Core Computer Science: Data Structures and Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Methodologies: Agile, Scrum

Projects

Automated Cloud Pentesting & Security Auditor | React.js, SpringBoot, MySQL, JWT, AES, Docker **January 2026**

- Developed a cloud security auditing and pentesting toolkit for AWS, Azure, and GCP environments.
- Implemented attack simulation, compliance monitoring, and AI-based remediation for cloud security.
- Built a reporting dashboard with **DevSecOps** practices for continuous security monitoring using

Weather App | React.js, Node.js, MySQL, JWT, Docker, CI/CD

March 2025

- Built a full-stack weather application with real-time weather updates using **REST API integration**.
- Deployed the application using AWS EC2, Docker, and Kubernetes for scalable management
- Automated deployment workflows using Docker and CI/CD pipelines.

Smart Urban Traffic Reduction (SIH Project) | Java, YOLOv8, ResNet, FPGA, Docker

September 2025

- Developed a real-time traffic management system using YOLOv8 and ResNet.
- Reduced latency using FPGA optimization techniques.
- Deployed the application was deployed using Docker for scalable performance

Certifications

- Salesforce AI Associate
- Oracle Certified Professional- Multicloud Architect Professional
- Cisco Certified CyberOps Associate
- Automation Anywhere Certified Essentials Rpa Professional

Achievements

- Solved 500+ DSA problems across coding platforms, strengthening analytical and problem-solving skills
- SIH Internal Round Qualifier
- GHCI Round 2 Candidate

Leadership Experience

Co-Lead

January 2025

KL Student Activity Centre – Dance Club

- Mentored Coordinating dance club activities, performances, and college events while leading team collaboration and promoting student engagement through cultural program .
